Email Address: Citizen Name & E-mail/Ex. 6

Comments:

I think that you may have a typo on your August 14 summary of sediment data,
as this sentence is very hard to decipher:

"Metal results that exceeded pre-incident levels were subsequently compared
to risk-based screening levels (with you so far). No results exceeded
recreational screening levels (oh, that's good to hear). However, comparison
to risk-based screening values found these exceedances to below risk
screening levels (wait, what?)."
